

Alarms

Want to set up an alarm on your iPhone? You can do so easily by following a few simple steps.

1. Open the Clock app that looks like this:

2. Select "Alarm" on the bottom bar.

3. Select the plus icon on the top right corner to create a new alarm.

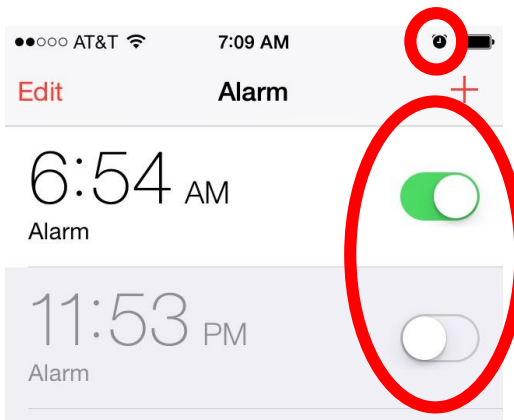

4. Fill in the appropriate information and select "Save" when you are done.

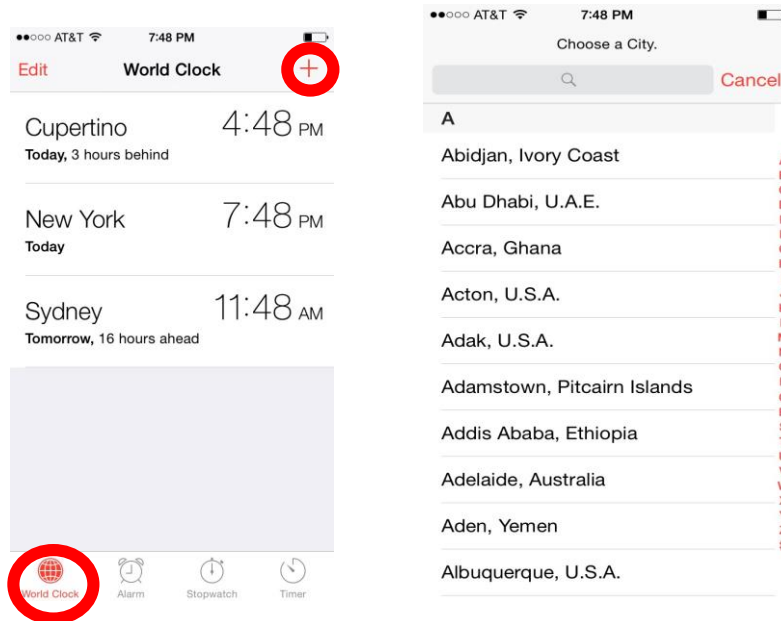

5. The alarm icon on the top right part of your status bar indicates your alarm is turned on. You can turn on and off the alarm by sliding the bar on the right side

of the indicated time. Green means the alarm is on and grey means the alarm is off.

6. Other features on the clock app include:

- a. The World Clock provides you with the time of other cities if you have friends or family out of your time zone. To add new cities, select the plus icon on the top right corner; you will be taken to the right screen below.

- b. The stopwatch allows you to time yourself or others. "Start" to begin timing and "Lap" to save a certain time interval. The smaller time on the upper right indicate the amount of time passed in the new interval after

"Lap" and the bigger time gives you the overall time. "Stop" to finish timing and "Reset" for a fresh start.

- c. The timer is great for reminders in the kitchen or time-dependent games. Scroll down to the appropriate time and "Start." You can "Pause" and "Cancel" the time in between if you would like.
